**Subject: site inspection and screening for hypertrophic cardiomyopathy**

**Location:**

Cattery owned by Amba Weaver

**Site inspection**

The cats have spacious and comfortable individual pens. All bedding and food is provided. All enclosures have either shelves or chairs for daytime lounging and baskets for sleeping at night. The conditions are clean, and the cats appear healthy and comfortable.

**Screening for hypertrophic cardiomyopathy:**

I have assessed 8 of Amba's breeding cats for the presence of possible hereditary heart diseases (hypertrophic cardiomyopathy being the most important one). Individual test results have been provided.

Kind regards,
